

Project Report

Seç Market

Digitalisation of dealer contracts related to financial affairs and their use via Doxagon

All dealer contracts were digitised by grouping them on the basis of document type specific to the contract. By creating a hierarchy for 17 regions on doxagon, contracts were made accessible from anywhere and by anyone authorised under the relevant regions.

Project Information

Dealer contract documents were digitised and made searchable in content with OCR (Optic character Recognition) and made available on the web to the relevant departments.

Evaluation

With a network of more than 2000 dealers in 81 provinces and a product range of over 5000, we are happy to take part in the digital transformation projects that will make the business processes of SEÇ Market, one of the important players of the retail sector, efficient and to have successfully completed the projects.

In this process, we would like to thank Mr. İsmail SUCAKLI, Financial Affairs Manager, and his team for helping us to make the right project design by transferring his experience and foresights to us during the analysis phase, which is the most important pillar of the project.

Kazım Yazıcıoğlu, REISSWOLF Turkey
Digital Operations Manager

We are extremely pleased with our cooperation with Reisswolf within the scope of our digital transformation project of our business processes and the efficiency we have achieved.

By digitalizing our dealer contracts with the Doxagon document management system, we have reduced our operational workload, provided cost advantages, and ensured that the data that is very important to us is stored securely in accordance with legal obligations. We would like to thank Reisswolf Turkey for their cooperation. "

Ismail Sucaklı
Seç Market-Financial Affairs Manager
